

Nedgroup Investments Flexible Income Fund

Class B1

March 2019

INCOME RANGE

RISK RATING

Risk reward profile

For credit and income instruments, while unlikely, capital loss may occur due to an event like the default of an issuer. The portfolio typically displays higher volatility and lower liquidity than a money market portfolio. The portfolio may be subject to currency fluctuations due to its international exposure.

Portfolio structure

1) The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.
Data source: © Morningstar Inc. All rights reserved.

2) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/01/2016 and ending 31/12/2018.

Portfolio attributes

- This fund aims to achieve a return in excess of 110% of the STeFI Call Index with a high degree of consistency and low capital volatility.
- The fund has the flexibility to invest in a range of domestic and offshore fixed income asset classes, although offshore investments are unlikely to exceed 15%
- The portfolio manager invests beyond the traditional fixed income, money market and bond assets to add value via a broad range of assets and strategies
- No direct equity exposure is held in this fund, however the portfolio does include listed property and convertible bonds
- The portfolio typically contains a well-diversified mix of income generating assets with a consistent income distribution and return profile.

Investment manager

- Abax Investments is an independent, owner-operated investment firm founded in 2003.
- AMG, a global asset management company with interests in leading fund management boutiques around the world, owns 25%, with the remaining 75% owned by employees and 3 charitable trusts
- Abax Investments is dedicated exclusively to fund management across a focused range of equity, multi-asset and fixed income portfolios
- Abax Investments have managed the Nedgroup Investments Flexible Income Fund since October 2012.

Investment philosophy

- A diversified alpha approach seeks to invest in the most attractive opportunities across a wide range of fixed income assets and strategies.
- Abax Investments believe they can generate a more consistent and potentially greater amount of alpha on fixed income funds by utilising a wide range of alpha sources, and balancing the risk across them.
- Return modelling and risk management is at the core of their process, as they calculate the returns of all assets and strategies in different market environments to construct portfolios with the potential to outperform in a range of market scenarios at acceptable levels of risk
- Abax Investments' structured approach of asset valuation and return modelling is fundamental in delivering consistent performance, and controlling risk.
